

Teaming Tips *An Adventure to connect your group in a fun way!*

Equipment: Two-by-fours; rope; skateboards; shopping carts; old tires; duct tape; any other equipment you can find

Objective: Transport your group down the race track in a "vehicle" you've created

Skill Focus: Group work, problem solving, persistence, leadership, and unity are necessary for success.

Procedures:

Bring the youth group to a large parking lot. Split them into groups of 5-10, giving each group a pile of the supplies. Instruct the groups they are to build "vehicles" to carry the entire group across the parking lot to the finish line. The wheels are the only part of the vehicle that can touch the ground. There are certain guidelines that must be followed:

1. The group must stay together at all times during the journey.
2. No team member can touch the ground between the starting point and the finish line except 2 people acting as "motors".
3. If either of these guidelines are broken, the entire group must return to the starting line and begin again.

Let's play!
